EDUCATION

- Web Dev Bootcamp, Le Wagon**
2024 – July 2024 | Berlin, Germany
Learned HTML, CSS, Bootstrap, JavaScript ES6, SQL, git, GitHub, Heroku, and Ruby on Rails. Designed, implemented, and shipped to production a clone of Airbnb
Shipped a prototype of Local Loop app as a leader of a team of 4 people in 2 weeks. Used Stimulus, JS, and Ruby on Rails.
- Industrial Design, ITM**
2012 – 2016 | Medellin, Colombia
Product design, ergonomics, materials science, and manufacturing processes.

LANGUAGES

- English
- Spanish
- German

PROJECTS

- Local Loop, Le Wagon**
2024 – July 2024
Events App created for people who are willing to socialize inside of the same postcode. We use different technologies such as Ruby on Rails, Stimulus.js and Bootstrap.
- Project Knight, Zalando**
February 2022 – January 2024
Massive Policy update for Nike inside of the Zalando platform.

PROFESSIONAL EXPERIENCE

- Zalando, Integration Manager**
2023 – 2024 | Berlin, Germany
Facilitated seamless integration of external brands onto the Zalando platform, enabling them to expand their market reach across Europe. Developed and implemented technical solutions to ensure smooth product catalog synchronization, inventory management, and order processing. Collaborated closely with cross-functional teams to optimize integration processes and resolve technical challenges.
- Zalando, Data / Content Management**
2021 – 2022 | Berlin, Germany
Spearheaded data management initiatives to ensure data accuracy, consistency, and accessibility across the Zalando platform. Implemented data quality checks and established data governance policies. Led the integration of multiple data sources into a centralized data repository, optimizing data utilization and retrieval. Trained and mentored team members on data management best practices. Contributed to process improvements resulting in a 20% reduction in data-related errors.
- Majorel, Content Management**
2019 – 2020 | Berlin, Germany
Monitors user behavior across multiple social media platforms to identify and mitigate risks such as harassment, hate speech, and fraudulent activities. Employs data analysis techniques to analyze user interactions and patterns, providing actionable insights for platform improvements. Collaborates with cross-functional teams to develop and implement strategies for enhancing user safety and trust.
